

# Algae Problems?

## Cloudy Water?

**Follow these simple steps weekly to help maintain sparkling clear water..**

Maintain a minimum chloride residual of 1-4ppm

Shock a minimum of once per week – additional shocking may be required under extreme weather conditions or with heavy bather load

Apply a BioGuard® Algaecide once a week – additional application may be required under extreme temperatures or after a rainfall

Circulate water a minimum of 10-12 hours per day / ideally 24/7

Apply Natural Result™ Enzyme to break-down organics – Oils, Lotions, Dirt and other organic matter at the waterline and in the skimmer

Consider Optimizer Plus® - Ask for details on how you can have an Algae Free pool.... Guaranteed!!

**Don't forget to brush and clean your pool & waterline weekly!!**
